THE AIR FORCE ANTITERRORISM (AT) PROGRAM

★AFI 31-210, 1 July 1997, is supplemented as follows:

★2.13.3. (Added)(AETC) Headquarters AETC responsibilities for the antiterrorism program are as follows:

2.13.3.1. HQ AETC/SF is the focal point for AT matters and is responsible for:

2.13.3.1.1. Coordinating AT policy and guidance with HQ USAF/SF.

2.13.3.1.2. Disseminating AT policy and guidance to bases.

2.13.3.1.3. Coordinating on any request from an AETC base for training quotas (unique course requirements pertaining to the AT program).

2.13.3.1.4. Coordinating any request for an exception to vehicle marking and painting requirements stemming from a terrorist threat.

2.13.3.1.5. Evaluating base AT plans and programs during staff assistance visits.

2.13.3.1.6. Allocating any HQ USAF Financial Management Board (FMB)-provided funding to AETC bases for security enhancements and AT projects.

2.13.3.1.7. Training HQ AETC directorate and staff agency antiterrorism officers and NCOs.

2.13.3.2. Each HQ AETC directorate and staff agency will implement an AT program and designate an AT program manager. The 12 FTW Installation Security/Resource Protection Plan (IS/RPP) will serve as the guideline for antiterrorism procedures. Each directorate will also provide a copy of a memorandum of appointment and changes of antiterrorism officer or NCO to HQ AETC/SF. Security managers may be appointed this additional duty.

Supersedes AFI 31-210/AETC Sup 1, 31 July 1995
OPR: HQ AETC/SFI (MSgt A. Green, Jr.)

HQ AFSFC/SFP – 1

HQ USAF/SFI – 1

HQ AFIA/IMP – 1

AUL/LSD – 1

2.13.3.3. HQ Air Force Recruiting Service (AFRS), HQ AFOATS, and HQ AETC directorates will comply with training requirements in AFI 31-210.

2.13.3.4. The HQ Air Force Officer Accession and Training Schools (AFOATS) designee for AT will coordinate the development of terrorist awareness and countermeasures training for permanent party personnel assigned to AFOATS field units.

★2.14.1. The installation chief of security forces will serve as the focal point for the base AT program. The security forces antiterrorism officer or NCO must continuously coordinate with the local Air Force Office of Special Investigations (AFOSI) to obtain terrorist threat information. Inform the installation commander of changes in the level of threat to base personnel or facilities.

★2.14.4. Develop an installation threat working group composed of representatives from security forces, intelligence, and AFOSI to assist in developing antiterrorism requirements. Inform personnel of the current THREATCON, using the following AETC visual aids (AETCVA), as applicable:

2.14.4.1. AETCVA 31-1, *THREATCON Alpha*.

2.14.4.2. AETCVA 31-2, *THREATCON Bravo*.

2.14.4.3. AETCVA 31-3, *THREATCON Charlie*.

2.14.4.4. AETCVA 31-4, *THREATCON Delta*.

★2.14.7. Identify specific THREATCON measures to be used as RAMs in the IS/RPP. The basic approach of RAMs is to identify, at any THREATCON, a set of measures from higher THREATCONs that can be employed to supplement the basic THREATCON measures already in place. Incorporate the use of RAMs in the IS/RPP and test procedures during wing exercises. RAMs may be used as a tool to test which measures have higher costs to an installation or facility in terms of productivity and to provide stimulation and training for security forces. RAM programs may be used to change the security atmosphere surrounding an installation. For example, selecting certain measures from higher THREATCONs during THREATCON Normal and implementing them for a couple of days or selecting certain measures for implementation due to a change in threat without implementing a full implementation of a higher THREATCON are proper uses of the RAM program. Administration of the RAM program is at the discretion of the installation commander.

★2.14.8. Identify “high risk” personnel and executive protection procedures in base IS/RPPs.

★2.15. Installations and AFRS and AFOATS organizations will conduct vulnerability assessments. The assessments will be reviewed annually or sooner, as threats dictate. HQ AETC/SF will develop a format for vulnerability assessments and provide the format to wing commanders. Each HQ AETC wing will ensure geographically separated units (GSU) belonging to the wing conduct vulnerability assessments, unless the GSU is included in a host base vulnerability assessment.

★4.1.1.1. AFRS, AFOATS, HQ AETC directorate, and wing AT program managers will coordinate Level I training with the servicing AFOSI detachment and maintain documentation of training.

★A2.1. Incorporate THREATCON measures from this attachment and any additional local measures in IS/RPPs.

REGAN D. SPRINGS, Colonel, USAF
Director of Security Forces
